Summary

Senior Frontend Engineer with **7+ years** of experience building **high-scale**, production-grade applications used by **5M+ users**. Known for taking frontend ownership **from architecture and implementation through deployment, monitoring, and debugging**, and turning complex requirements into performant, maintainable user experiences. **Leverages AI-assisted engineering to ship faster, modernize codebases, and solve complex problems.**

Experiences

Senior Frontend Engineer

Tapsi Doctor · Aug 2025 – Present (+1 year) · Tehran (Remote)

- **Owned frontend architecture and end-to-end delivery** for high-scale healthcare products, taking features from technical design and implementation through deployment, monitoring, and production debugging.
- **Modernized** critical frontend modules into **scalable, reusable architecture**, reducing duplicated implementation by **~35%**, improving development consistency, and shortening delivery time for new product flows by **~25%**.
- Designed and automated frontend **CI/CD and release workflows** using Docker, n8n, and S3-based delivery, reducing manual deployment effort by **~70%** and making releases faster, repeatable, and less error-prone.
- **Built real-time** frontend experiences for **event-driven notifications**, background jobs, scheduling, and engagement flows, enabling timely user interactions across high-traffic product journeys without relying on manual refreshes.
- Introduced **AI-assisted development workflows into daily frontend engineering**, using AI to analyze unfamiliar modules, map dependencies, accelerate large-scale refactoring, create and update tests, and investigate production errors.

Frontend Team Lead

Routaa · Jul 2021 – Aug 2025 (4 years, 2 months) · Tehran

- **Led technical direction** across **10+** production applications and multiple engineering teams, influencing architecture, technology decisions, and engineering standards across frontend and backend systems with React, Vue, Node.js, TypeScript, and NX.
- **Led and mentored** a team of **5+ engineers** while acting as a technical leader, driving architectural decisions, code reviews, and engineering practices that improved team autonomy and delivery consistency by **~25%**.
- Owned the architecture and **delivery of multiple B2B and B2C products**, turning complex business requirements into scalable platforms and workflows that supported thousands of users and critical **day-to-day** business operations.
- Built and standardized **shared frontend and backend foundations**, including Design Systems, reusable libraries, Node.js services, increasing code reuse by **~40%** and reducing duplicated implementation across teams.
- **Modernized legacy applications** and introduced scalable engineering practices, reducing UI-related defects by **~30%**, improving application performance by **~25%**, and accelerating feature delivery by **~20-25%** across multiple products.
- Worked closely with **Product, Design, QA, Backend, and company leadership** to shape technical roadmaps, resolve cross-team challenges, identify engineering risks, and drive high-impact initiatives from technical strategy through production delivery.

Frontend Developer

Apollo · Aug 2020 – Jul 2021 (1 year) · Estonia Remote

- Built **3 applications** with Vue/Nuxt in the **cryptocurrency** and e-commerce domain, including public-facing platforms and admin panels.
- Worked closely with designers and backend engineers to deliver performant, user-centric interfaces under tight timelines.
- Built **real-time analytics and reporting dashboards**, enabling operational visibility and faster data-driven decision-making.
- Improved application scalability through reusable architecture patterns, modular component design, and optimized data flows.

Frontend Developer · Tehran

TMBA · May 2019 – Aug 2020 (1 year, 4 months)

- Delivered multiple client-facing **e-commerce** websites with a strong focus on clean UI and performance.
- Improved internal admin tools through UI refactoring, reducing complexity and improving usability.

Skills

Frontend Development: TypeScript, JavaScript, React.js, Next.js, Vue.js, Nuxt.js, HTML, CSS, Accessibility, Core web vitals

Architecture & Engineering: Micro-Frontends, System Design, REST APIs, GraphQL, gRPC, WebSocket, SignalR, MQTT

Testing & Quality: Jest, Vitest, Cypress, Playwright, SonarQube, Bugsnag

AI & Automation: Claude Code, Cursor, Github Copilot, AI-assisted Development, n8n, AI Workflow Automation

DevOps & Infrastructure: GitLab CI/CD, Github Actions, Docker, AWS, S3, Linux, Nexus, ArgoCD

Backend & Integration: Node.js, Express.js, NestJS, MongoDB, MySQL, PostgreSQL, Prisma

Build & Tooling: Git, Vite, Webpack, Rollup, Rolldown, NX, Turborepo, Sentry, Mapbox, Figma

Education

Bachelor of Computer Engineering

Azad University · 2018 – 2023

Languages

English – Fluent
